1989 FY STATISTICAL REPORT * INTRODUCTION

Management Services presents the 1989 Fiscal Year Statistical Report, a compilation of select statistics on the number of inmates who were received at, confined in, and released from the Institutional Division of the Texas Department of Criminal Justice between September 1, 1988 and August 31, 1989.

The report is published to supply the agency with a perennial source of comparative inmate demographics, to serve as a resource document for criminal justice research, and to provide information to the public. Sources within the agency include Data Processing and Communications, Financial Operations, and the Windham School System. Texas MSA population figures were obtained from the Texas Department of Public Safety.

The report is composed of five main sections: Summary, On-Hand, Receives, Releases, and Charts.

SUMMARY. Section I presents inmate population trends and the average inmate cost for the past decade. Demographic highlights for the current fiscal year and unit population and Windham School System information for the past three years is also presented.

ON-HAND. Section II provides data on the number of inmates who were in the active inmate population on the last day of the fiscal year.

RECEIVES. Section III provides data on the number of inmates who were received at the Institutional Division during the fiscal year. The four primary categories of receives are New Receives, Parole Violators, Mandatory Supervision Violators, and Shock Probation Violators. Because of their small number, statistics are not presented on inmates received as conditional pardon violators.

A. New Receives. These are the inmates who were received with new convictions. Excluded are record changes that involve no inmate movement such as additional convictions received subsequent to original commitments.

B. Parole Violators. These are the inmates who were received after violating the conditions of release to the community on Parole.

C. Mandatory Supervision Violators. These are the inmates who were received after violating the conditions of release to the community on Mandatory Supervision.

D. Shock Probation Violators. These are the inmates who were received after violating the conditions of supervision in the community on Shock Probation.

E. Total Receives. This section gives statistics on the total number of inmates received by the four receive categories.

When a violator is received with a new conviction for an offense committed while under supervision, the record is reviewed to compute the amount of time that must be served to satisfy the sentence on the prior conviction. If the amount of time left exceeds the amount of time required to satisfy the sentence for the current conviction, the inmate keeps the prior identification number and is counted in the appropriate violator category. The prior offense of conviction becomes the current Offense of Record. If the amount of time left on the previous conviction is less than the amount of time required to satisfy the sentence for the current conviction, the inmate receives a new ID number and is counted in the New Receives category. The new offense of conviction becomes the current Offense of Record.

RELEASES. Section IV provides data on the number of inmates who were released from the Institutional Division during the fiscal year. The four main categories of releases are Discharge, Parole, Mandatory Supervision, and Shock Probation. Because of their small number, statistics are not presented on inmates released to conditional pardon.

A. Discharge. Statistics on the number of inmates who were released by expiration of sentence or by court order are presented in this section. Excluded are changes to the record that involve no inmate movement such as multiple sentences that are discharged individually. Legislation enacted in 1977 required all inmates to be released to supervision in the community prior to discharge of the sentence. For that reason, the number of discharge releases has steadily declined.

B. Parole. This section covers data on the inmates who were released on parole under conditions and provisions for supervision in the community as determined by the Board of Pardons and Paroles (BPP).

C. Shock Probation. Information relevant to eligible offenders who were released to the supervision of the Criminal Justice Assistance Division is presented in this section. A candidate for release on shock probation serves between 60 and 180 days in the Institutional Division before the individual record is reviewed by the sentencing judge. If release is appropriate, the judge sets the conditions and provisions for probation.

D. Mandatory Supervision. Information on the inmates who were released to mandatory supervision under conditions and provisions for supervision in the community as determined by the BPP is presented in this section. Article 42.12 of the Texas Code of Criminal Procedure was amended in 1977 to provide new requirements for all inmates who were discharged from the Institutional Division by expiration of sentence and who were not released on parole. These inmates are now released to the supervision of the Board of Pardons and Paroles for the period of time equivalent to the maximum sentence minus the calendar time actually served on the sentence.

E. Total Releases. This section provides statistics on the total number of inmates released by the four main release categories.

1989 Fiscal Year Statistical Report - Introduction (Continued)

CHARTS. Section V presents charts of select data that compare On-Hand, Total Receives, and Total Releases populations.

DESCRIPTIVE VARIABLES. The fiscal year report presents 17 descriptive variables in seven basic tables for male, female, and total inmates. Table 1 addresses gender, race, and age. Table 2 presents place of conviction and place of residence. Table 3 covers offense and offender status. Table 4 gives education data. Table 5 presents prior criminal record information. Table 6 gives classification data. Table 7 shows sentence information.

- 1a. Gender By Month - the number of inmates by sex is shown by month;
- 1b. Race - Black, Hispanic and White are the three primary racial groups;
- 1c. Age in Years - principal age groups are presented;

- 2a. Place of Conviction - by Texas Metropolitan Statistical Area (MSA);
- 2b. Place of Residence - by Texas (MSA);

- 3a. Offense of Record - offense that resulted in the longest sentence;
- 3b. Offender Status - aggravated or non-aggravated offender;

- 4a. IQ Score - intelligence quotient scores (IQ) of inmates received from October 1978 through January 1984 were derived from the Revised Beta II System. Since February 1984, inmates who score 70 or less on the Revised Beta II are administered the Culture Fair IQ test. Inmates who score 70 or less on the Culture Fair are administered the Wechsler Adult Intelligence Scale Text (Revised);

- 4b. EA Score - prior to 1987, education achievement scores (EA) were derived from the Test of Adult Basic Education (TABE) which was replaced by the Adult Basic Learning Examination (ABLE). ABLE provided a score past the high school level (PHS). The ABLE test was replaced in September 1989 with a revised version of TABE. Inmates with a PHS level are shown in a separate EA category.

- 4c. Academic Grade - the highest self-reported school grade claimed by inmates outside the Institutional Division;

- 5a. Prior Prison-TDCJ/ID - prior number of confinements in TDCJ/ID;
- 5b. Prior Prison-Other - prior number of confinements in other prisons;
- 5c. Prior Probations - prior number of probations;

- 6a. Conduct Classification - the good conduct time categories of inmates;
- 6b. Custody Classification - the security custody categories of inmates;

- 7a. Sentence Length - the maximum sentence for the offense of record;
- 7b. Average Time Served - for releases, the average calendar time served.

Information that is missing from the record is presented within each table next to the entry designated as "unclassified."
